Exposing and Opposing the Vaccination Agenda

Parents Against Mandatory Vaccines

DO NOT SIGN the Refusal to Vaccinate form!

Posted on August 18, 2015

IT IS A TRAP!

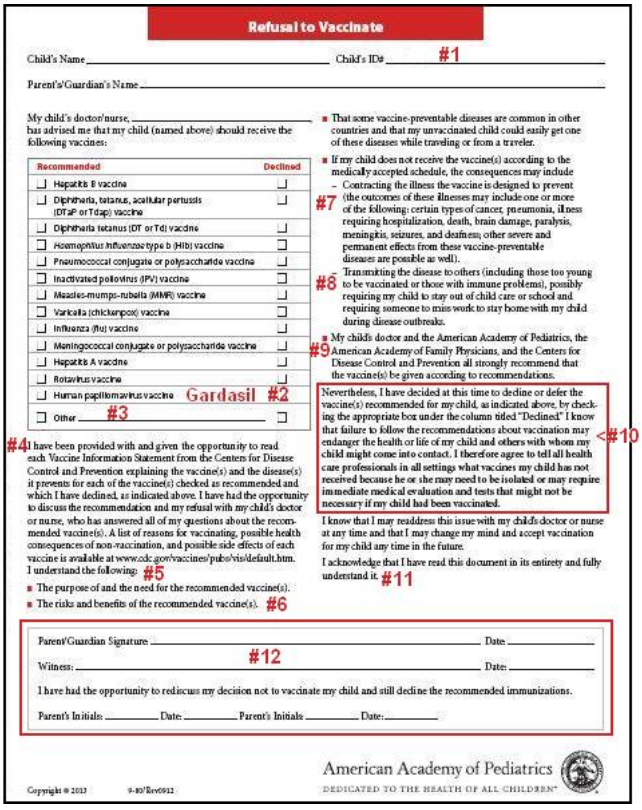
THE *REFUSAL TO VACCINATE* DOCUMENT

The *Refusal to Vaccinate* document was created by the CDC or the American Academy of Pediatrics 'legal department' as a response to the growing number of toxic vaccines recommended by them and the growing number of parents who are becoming educated on this issue. According to CDC recommendations, our children should now receive 37 doses of vaccines between 0-16 years. [See CDC recommended Vaccine Schedule]

This document, now being used to overcome vaccine awareness, is the most diabolical strategy possible! It is unlikely that physicians have any idea what they are asking their patients to sign . . . or to sign away. It is essentially a signed confession. So please read and understand why no one should sign it and why it is really something other than what it appears to be.

TWELVE REASONS YOU CANNOT SIGN *REFUSAL TO VACCINATE*

Here are 12 reasons why no parent can sign this document unless they are interested in being statutorily charged with neglect or intentionally causing harm. Repeating more boldly: this document, if signed, could be used to have your child(ren) removed from your custody! It was created to stand up in court, which is why they require the parent's signature to be "witnessed"?



Refusal to Vaccinate

Child's Name _____ Child's ID# _____ #1

Parent's/Guardian's Name _____

My child's doctor/nurse, _____ has advised me that my child (named above) should receive the following vaccines:

Recommended	Declined
☐ Hepatitis B vaccine	☐
☐ Diphtheria, tetanus, acellular pertussis (DTaP or Tdap) vaccine	☐
☐ Diphtheria tetanus (DT or Td) vaccine	☐
☐ Haemophilus influenzae type b (Hib) vaccine	☐
☐ Pneumococcal conjugate or polysaccharide vaccine	☐
☐ Inactivated poliovirus (IPV) vaccine	☐
☐ Measles-mumps-rubella (MMR) vaccine	☐
☐ Varicella (chickenpox) vaccine	☐
☐ Influenza (flu) vaccine	☐
☐ Meningococcal conjugate or polysaccharide vaccine	☐
☐ Hepatitis A vaccine	☐
☐ Rotavirus vaccine	☐
☐ Human papillomavirus vaccine Gardasil #2	☐
☐ Other #3	☐

#4 I have been provided with and given the opportunity to read each Vaccine Information Statement from the Centers for Disease Control and Prevention explaining the vaccine(s) and the disease(s) it prevents for each of the vaccine(s) checked as recommended and which I have declined, as indicated above. I have had the opportunity to discuss the recommendation and my refusal with my child's doctor or nurse, who has answered all of my questions about the recommended vaccine(s). A list of reasons for vaccinating, possible health consequences of non-vaccination, and possible side effects of each vaccine is available at www.cdc.gov/vaccines/pubs/vis/default.htm. I understand the following: #5

- The purpose of and the need for the recommended vaccine(s).
- The risks and benefits of the recommended vaccine(s). #6

- That some vaccine-preventable diseases are common in other countries and that my unvaccinated child could easily get one of these diseases while traveling or from a traveler.
- If my child does not receive the vaccine(s) according to the medically accepted schedule, the consequences may include
  - Contracting the illness the vaccine is designed to prevent (the outcomes of these illnesses may include one or more of the following: certain types of cancer, pneumonia, illness requiring hospitalization, death, brain damage, paralysis, meningitis, seizures, and deafness; other severe and permanent effects from these vaccine-preventable diseases are possible as well). #7
  - Transmitting the disease to others (including those too young to be vaccinated or those with immune problems), possibly requiring my child to stay out of child care or school and requiring someone to miss work to stay home with my child during disease outbreaks. #8
- My child's doctor and the American Academy of Pediatrics, the American Academy of Family Physicians, and the Centers for Disease Control and Prevention all strongly recommend that the vaccine(s) be given according to recommendations. #9

Nevertheless, I have decided at this time to decline or defer the vaccine(s) recommended for my child, as indicated above, by checking the appropriate box under the column titled "Declined." I know that failure to follow the recommendations about vaccination may endanger the health or life of my child and others with whom my child might come into contact. I therefore agree to tell all health care professionals in all settings what vaccines my child has not received because he or she may need to be isolated or may require immediate medical evaluation and tests that might not be necessary if my child had been vaccinated. #10

I know that I may readdress this issue with my child's doctor or nurse at any time and that I may change my mind and accept vaccination for my child any time in the future.

I acknowledge that I have read this document in its entirety and fully understand it. #11

Parent/Guardian Signature _____ Date: _____

Witness: _____ #12 Date: _____

I have had the opportunity to rediscuss my decision not to vaccinate my child and still decline the recommended immunizations.

Parent's Initials: _____ Date: _____ Parent's Initials _____ Date: _____

#1

The document attaches a child ID # that will be identifiable in the electronic records system across the country. Everyone from the school to the NSA will be able to determine who is and who is not vaccinated.

#2
The scientific term for HPV vaccine is listed to discourage parents from making the connection to the dangerous vaccine for HPV called Gardasil. [See Gardasil: Former Merck Doctor predicts greatest medical scandal of all time]

#3
Establishing a vaccination history is part of the Police state registry system being set up to track your vaccination status.

#4
The CDC Vaccine Information Statement is pure unadulterated propaganda. The vaccination information coverup was documented and exposed in an extremely important paper Health Hazards of Disease Prevention (2011). Also see info about the CDC – #9 (below).

#5
Again the parent is misled to think the truth about vaccine risks is on the CDC web site.The doctor has the vaccine package inserts right in his/her office. Why is it not offered and explained to the parent? The physicians themselves may or may not have read them. However, physicians are certainly aware that if the parents read the 'official risks' put out by the drug corporations, they would refuse the vaccines. Full disclosure is almost NEVER a part of the process.

#6
"I understand the following: The risks and benefits of the recommended vaccine(s)." This of course would be agreeing to a false statement. You cannot understand the risks without reading and understanding the package inserts, therefore how can you answer in the affirmative? And what about all of the vaccine facts that aren't even listed in the package inserts that have been 'covered up' for many years?

#7
Parents are falsely told that without vaccines their children could suffer dire illnesses but are not told the dire illnesses/injuries the vaccines themselves could cause . . . including death.

#8
This refers to the "herd immunity myth" of 1933, which has been proven unscientific over and over and over again. Simply put: if other children have been vaccinated – and the vaccines work – they won't contract a disease from your child.

#9
Entities are listed as "strongly recommending" the vaccine schedule. Again however, parents are NOT given full disclosure as to exactly who/what the entities are and what their motivations might be. Listed on the *Refusal to Vaccinate* document are the following entities and a brief description of their motivation:

- **The 'physician'** – is rewarded for administering vaccines by higher reimbursements for his fees. His vaccine "rates" are checked to determine whether or not he/she is entitled to more money. Physicians, public health workers, and drug companies have all been given immunity from any possible lawsuits that may arise as a result of vaccine-caused injury or illness. In other words, if a vaccine harms your child or causes autism you cannot sue any of them. They all have a liability exemption.
- **The American Academy of Pediatrics** which is a corporation headquartered in the STATE OF ILLINOIS – that receives lots of money from drug corporations for advertising in their journal, etc. This organization relies heavily on what they falsely believe to be a "government" health advocacy agency known as the Center for Disease Control (CDC).
- **The American Academy of Family Physicians** which is a corporation headquartered in the STATE OF KANSAS – that also receives lots of money from drug corporations for advertising in their journal, etc. This organization also relies heavily on what they falsely believe to be a "government" health advocacy agency known as the Center for Disease Control (CDC).
- **The Center for Disease Control (CDC)** which is a corporation headquartered in the STATE OF GEORGIA. The CDC IS NOT PART OF A LEGITIMATE GOVERNMENT. Repeat: the CDC IS NOT PART OF A LEGITIMATE GOVERNMENT! It is a private for-profit corporation listed on Dun and Bradstreet that is chartered under the umbrella of the private for-profit UNITED STATES corporation with extremely close ties to the pharmaceutical companies and a sordid history of corruption. [See: CDC Exposed]

Bottom line: all of the above "entities" make more money if they vaccinate our children and even more if our children get sick from the vaccines . . . including the pediatricians themselves.

#10
This is the broadest and most nefarious part of this document.
"Nevertheless, I have decided at this time to decline . . . I know that failure to follow the recommendations about vaccination may endanger the health or life of my child and others . . . I therefore agree to tell all health care professionals in all settings what vaccines my child has not received because he or she may need to be isolated or may require immediate medical evaluation and tests that might not be necessary if my child had been vaccinated."

This is not only deceptive and untruthful [see numbers 2-8] it is asking you to confess that you know you are harming your child (and others) and don't care. It is asking you to agree to inform any/all people who represent themselves as healthcare "professionals" (not defined) of your child's vaccination record. You are also consenting to allow undefined healthcare professionals to remove your son or daughter from your care and place him or her in isolation for unproven or unknown exposure to a myriad of undefined communicable diseases – with or without testing.

#11
This is an admission that you understand this contractual document – and its significance – 'in its entirety'. This means that you accept the false information sited as factual, chose NOT to do what you now know to be good for your child and others (are negligent), obligate yourself to embarrass and confuse your child by tracking and reporting on the vaccines you protected your child from, and give permission for your child to be tested or removed from your care and put in isolation for any 'supposed' exposure to any 'undefined' communicable disease by anyone calling themselves a healthcare worker. [Ohio Revised Code 3701.13]

In short, the form wants you to attest to the following . . . in writing and in the presence of a witness:

- You understand you are signing a contract with performance requirements
- You accept false information as factual and don't care
- You don't care if your child or others are harmed by your decision
- You agree to volunteer to all pretend healthcare workers your child's vaccine record
- You agree to allow others to test and/or isolate your child for unproven exposure to a disease

#12
Here is the kicker. As you are asked to sign, initial and date this document in front of a witness, should a custody dispute ever arise (either between parents or with Child Protective Services) this document could be used against the mother or father that signed it.

In defense of physicians, they have been told – via the instructions accompanying the *Refusal to Vaccinate* document – that parents could sue them should their sons or daughters come down with any of the diseases vaccines are supposed to prevent. Their fear of being sued is why physicians are so insistent that parents sign the *Refusal to Vaccinate* document. An excellent alternative, for both physician and parent, is the Vaccination Notice. This notice corrects misconceptions about vaccines, the herd immunity myth, and the CDC. It also brings the liability (or lack thereof) to the physicians attention. See **The Vaccination Notice**.

NOTE

If you have already signed the *Refusal to Vaccinate* document, go to this page for suggestions as how to rescind or nullify it: So you've signed the Refusal to Vaccinate document
